

Community Conference

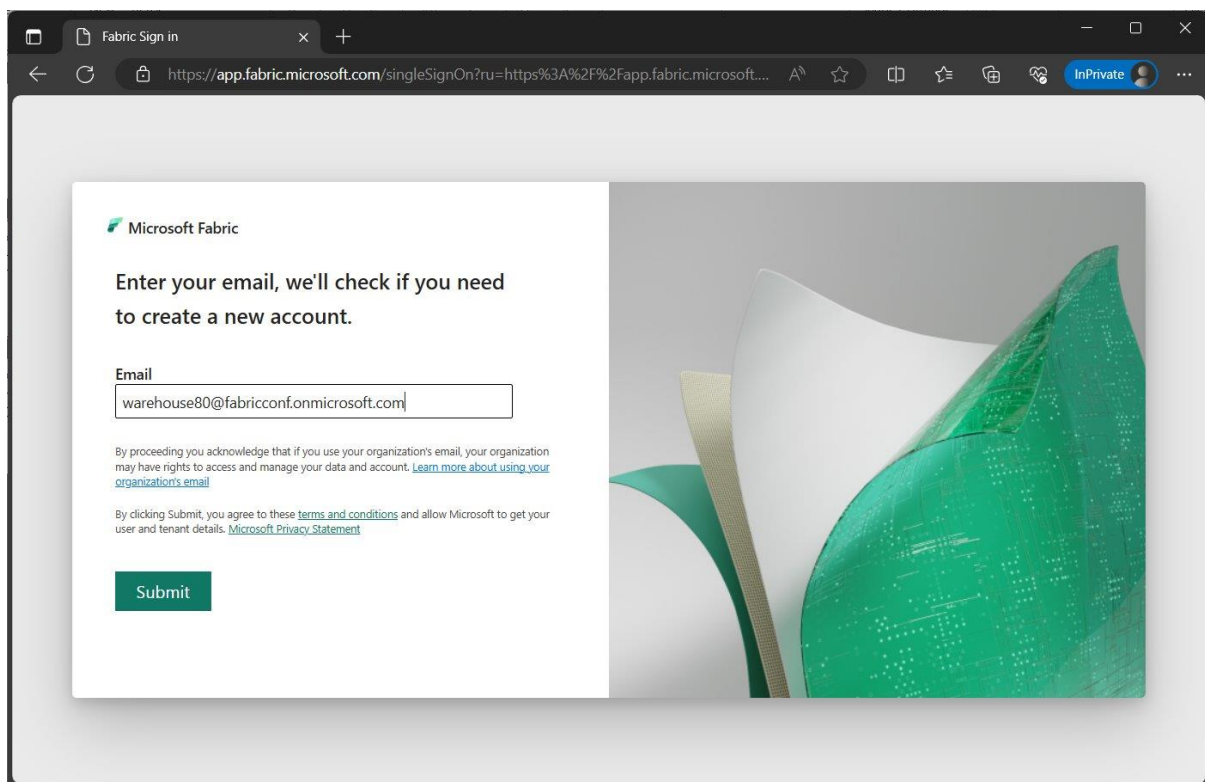

Lab 1 – Sign-in and Tenant Settings

Lab 1.1 Sign-in

There have been created user accounts to all attendees at a special FabCon tenant.

Start by creating a new profile in your browser or use InPrivate window.

- Navigate to <https://app.fabric.microsoft.com/>
- Login with the email address handed out to you
XXX@fabricconf.onmicrosoft.com and password is FabCon2025
- The first time you login, you are prompted to change the password
- You may be asked to stay signed in and you can select whatever option you prefer

Notice: The users will be removed after the workshop

Lab 1.2 Tenant Settings report

Navigate to the Tenant Admin workspace.

Community Conference

Workspaces -> Tenant Admin

Or use this direct Link: <https://app.fabric.microsoft.com/groups/0de2e7ba-cee9-444d-9e68-d4cf1dba5f24/list?experience=fabric-developer>

Tenant setting details

Action	Consider	Subtopic	Notes	URL
!	▲	Publish to web	Disable it - except for Admin	
!	▲	Export to .csv	Limit and train users to connect to Power BI dataset in Excel	
!	▲	Certification	Should set up process & definitions first	
!	▲	Allow specific users to turn on external data sharing		
!	▲	Web content on dashboard tiles	Malicious web content can pose a risk	
	▲	Users can work with datasets in Excel using a live connection	As possible sensitive data should be secured further than only workspace access.	
	▲	Users can try Microsoft Fabric paid features	Recommends training sessions before trials or license	
	▲	Guest users can work with shared datasets in their own tenants		
	▲	Make promoted content discoverable	Limit to self-service-enabled-users	
	▲	Create workspaces (new workspace experience)	We recommend you assign one or more security groups. These groups can be granted or denied permission to create workspaces	
	▲	Allow downloads from custom visuals		
	▲	Usage metrics for content creators		
	▲	Allow service principals to use Power BI APIs	Related to embedding content, streaming datasets & PUSH datasets; Limit to developers	
	▲	Allow service principals to use read-only admin APIs		
	▲	Enhance admin APIs responses with detailed metadata		
	▲	Enhance admin APIs responses with DAX and
